HEALTH WARNING

There may be a risk of **serious physical injuries** from working at your computer workstation.

Some studies have suggested that long periods of typing, improper workstation setup, incorrect work habits, stressful work conditions and relationships, or problems in your personal health may be linked to injuries. These injuries could include carpal tunnel syndrome, tendonitis, tenosynovitis, and other musculoskeletal disorders.

The warning signs of these disorders can occur in the hands, wrists, arms, shoulders, neck, or back, and can include:

- ❒ Numbness, burning, or tingling
- ❒ Soreness, aching, or tenderness
- ❒ Pain, throbbing, or swelling
- ❒ Tightness or stiffness
- ❒ Weakness or coldness

Symptoms may be felt during typing, while using a mouse, or at other times when no work with the hands is being performed, including during the night when these
symptoms might awaken you. If you experience these symptoms, or any other persistent or recurring pain or discomfort that you think may be related to using a computer, you should promptly consult a qualified physician and, if available, your company's health and safety department. The earlier a problem is properly
diagnosed and treated, the less chance there is that it will progress to a disabling condition.

HP created a "Safety & Comfort Guide" that describes proper workstation setup,
posture, and health and work habits for computer users. In addition, it also contains product safety information applicable to all HP products. This guide can be downloaded from the internet at **http://www.hp.com/ergo**

Product Registration

Registration is quick, easy and offers: Email updates containing notifications about product enhancements, the most recent support alerts, and driver updates specific to the product(s) you own.

For faster help, be sure to register your recently purchased product at **http://www.microinv.com/hp/register.cfm**

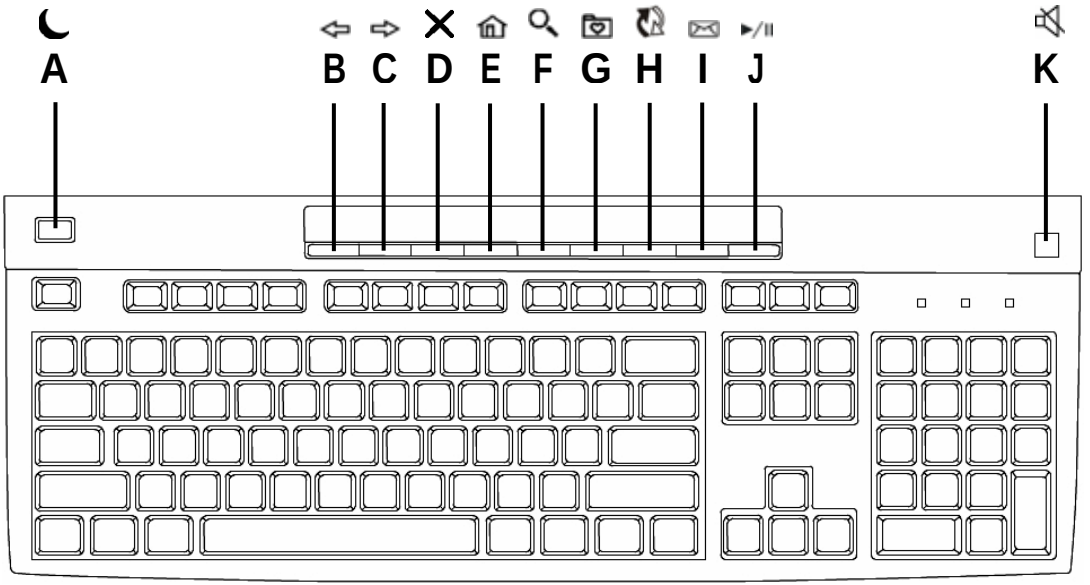
Click on Start, select Settings / Control Panel / Keyboard, to customize your keyboard settings.

Identifying Special Keyboard Buttons



Special Keyboard Buttons

Figure Key	Icon	Feature	Description
A		**Standby**	Puts PC into or out of power-saving mode. May take 10-30 seconds before screen reappears.
B		**Back**	Returns to the last web page you visited.
C		**Forward**	Views the next web page you viewed before.
D		**Stop**	Stops loading the web page you are viewing.
E		**Home**	Opens your home page using your default browser.
F		**Search**	Opens the search menu.
G		**Favorites**	Opens the Internet "My Favorites" folder.
H		**Refresh**	Refreshes the current web page you are viewing.
I		**Email**	Opens the default program you use for email. For Internet Explorer, you can select "Tools / Internet Options / Programs / Email" to change the default program you use for email.
J		**Play / Pause**	Plays / Pauses the current track / file.
K		**Mute**	Mute sound. Push again to turn the mute off.

Troubleshooting

- If your keyboard is not responding, be sure to check if the connector is correctly installed into your computer.
- You may have connected your keyboard while the computer was turned on. Turn your computer off and turn it on again with the keyboard attached.

FCC STATEMENT

This device complies with part 15 of FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction guide, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and the receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult a service representative for help.

Properly shielded and grounded cables and connectors must be used in order to comply with FCC emission limits. Hewlett-Packard is not responsible for any radio or television interference caused by using other than recommended cables and connectors or by unauthorized changes or modifications to this equipment. Unauthorized changes or modifications could void the user's authority to operate the equipment.
